

**Beatrix Waechter Alsanus, Professor
Microbial Horticulture Laboratory
Dept of Horticulture, SLU**

Excellent, fast and highly reliable service, these are the keystones of my experience in dealing with Dorte Egelund ApS. My laboratory at the Swedish University of Agricultural Sciences, Alnarp, Sweden, has been in contact and dealing with Dorte Egelund since the foundation of the company. Dorte Egelund ApS has supported us both in allocating orders for instruments and for consumables and in finding methodological solutions to scientific questions. The latter ones were launched through Dorte Egelund's substantial network and through discussions at meetings and during client visits. As a general agent for Biolog Inc, she has also facilitated on campus activities in the framework of our postgraduate school, Microbial Horticulture, and participated in knowledge transfer on questions regarding laboratory techniques.
